## Artist Statement

For most of my life I've been making art in some shape, form or medium. I rarely start out with an idea or picture in my mind—my work is intuitive and I just let my inner voice guide me as to what color/medium/product to use next. When working on a project I make connections within myself to the outside world. I find the act of creating to be a mental and physical process that helps guide me through feelings towards issues I'm currently facing or ideas I've yet to discover.
