

KIP BROWN-HOLLINGSWORTH

Since childhood I have been playing with color..first the leaves, flowers and grasses in my neighborhood placing them into patterns and colors to please my youthful imagination. Then came pieces of fabric, buttons and trims; my grandmother and mother were passionate sewers and I had lots of fun stuff to work with! A natural extension was going into the interior design field which I have been involved in for decades. There the client's tastes put restrictions on the finished look. With jewelry design I can and do anything I want. I love to create size, scale and color combinations that differ from the ordinary. Some rather unusual and to my eye much more fun to behold. I hope you enjoy my creations and wear them as a piece of art that speaks to you.
