

LANA DOOLAEGE

I love making jewelry! I am one of those people happiest when I am creating. I take pride in the fact that all my pieces are hand crafted from beginning to end, creating a one-of-a kind work of art, a small scale sculpture of precious metal and gemstone.

I have had the privilege of apprenticing with my father-in-law, a master jeweler. A family of artists, I work alongside my husband and feel very fortunate that my partner works with me in both life and art.

Most of my inspiration comes from nature and this wondrous world around us. Sometimes, the inspiration comes from the stone itself. I use only natural gemstones, each one hand selected. Much of my work is done in silver since it gives me the most freedom to explore new designs. I do work in a range of metals from sterling silver, 14K white, red and yellow gold.

Thank you for viewing my work. Always feel free to ask questions, give comments or suggestions. I welcome custom work and would love to make a special one-of-kind work of art just for you. In purchasing your own small scale sculpture, you can be proud in supporting local art, buying handmade and continuing traditional craftsmanship.
